Hello,

My name is PJ Tamburello and I am a law student at Barry University School of Law in Orlando, Florida. I am taking a Water Pollution law course and was hoping to get more information about about how the EPA works with the Florida Department of Environmental Protections, specifically in regard to how polluting activities are regulated in the wetlands. What are the standards governing polluting activities with regard to how much pollution is allowed?
How do you notify the public about changes in agency policy or of polluting activities that may impact the general public?

If whomever receives this message could either answer my questions or point me in the direction of a person with whom I could get answers it would be greatly appreciated.

Thank you,

PJ Tamburello

Thank you for your response
